Dear Sir/Madam,

I hope this letter reaches you in good spirits.

My name is Khodor El Hajj Hassan and I would like to apply for a Master's in Computer Security implemented by starting for the first semester of 2022-2023. I am a highly motivated young professional who perceives this degree to be beneficial for my future career in (Cyber security, network security, data loss prevention and threat intelligence). My strong academic background in communication engineering makes me a strong candidate for this competitive program.

I hold a Bachelor's Degree in communication engineering from Lebanese International University. Since then, I have clearly determined my career goals and would like to continue my education at your esteemed university.

I will be honored to continue my Master's Degree in EPITA for many reasons, among them it is one of the leading French science and engineering schools, EPITA that is committed to ensuring that all students have meaningful opportunities for personal growth and professional achievement in the future plus EPITA is listed among the 10 best engineering schools it is first in the category of computer engineering schools focused on the digital sector.

I would like to learn more about computer and network security, and after looking over your curricula, I believe that the university offers the best opportunities for me to educate myself further in this field.

I believe that my education and ambition about computer security and how it could affect the society offer a solid foundation. However, through the university's master's program, I hope to develop and learn more about the field of Cyber security.

Attached to this letter are the documentary requirements necessary for my admission. Thank you very much for your consideration.

Sincerely,
Khodor EL Hajj Hassan.
